

Toyota Hilux N80
MY2015 – MY2025
Predator & Toro Front Bar

IMPORTANT! – READ BEFORE INSTALLATION

- When installed in accordance with these instructions, the front protection bar does not affect the operation of the vehicles SRS airbags.
- This product must be installed exactly as per these instructions using only hardware supplied.
- Take a few moments to read instructions thoroughly before beginning work.
- In the event of damage to any bar component please contact OFFROAD ANIMAL to arrange repair/replacement of components.
- Do not use this product for any vehicle make or model other than that specified on these instructions.
- Do not remove labels from this product.
- This product and its fixings must not be modified in any way unless stated in these fitting instructions.
- The installation of this product is recommended for trained personnel.
- These instructions are correct at time of publication. OFFROAD ANIMAL cannot be held responsible for the impact of any changes subsequently made by the vehicle manufacturer. If you find something has changed please contact us to let us know!
- During installation it is the duty of the installer to check correct operation/clearances of all components.
- If Instructions are to be printed for reference in the workshop, it is recommended that they are printed in colour, for best legibility.

GENERAL CARE AND MAINTENANCE

Use caution when cleaning with pressure washers, as they may compromise the product coating's integrity. Exercise care to avoid surface damage.

Only wash the product with a PH neutral car wash to prevent paint damage and discolouration.

Do not use acidic or alkaline based cleaning products.

Plastic parts may be maintained with silicone spray.

It is important to perform regular checks (pre/during/post trip or on an annual basis) on the installed product. More frequent checks may be required in extreme use cases. Checks include:

- Visual inspection for damage (eg. cracks, chips, dents etc.)
- Electrical wiring is not rubbing anything or worn out
- Bolts are torqued to correct specification (see torque guide below)

For touching up small stone chips, Offroad Animal recommends the following paint products:

- Dupli-Color Trim & Bumper Paint Black (TB101)
- VHT Hood, Bumper & Trim Paint Black (SP27)

BOLT TORQUE SETTINGS

Use the following bolt torques on all general fasteners, unless otherwise specified.

GENERAL FASTENERS	
Size	Torque Nm
M5	5 Nm
M6	9 Nm
M8	22 Nm
M10	44 Nm
M12	77 Nm

Use the following bolt torques on all structural front bar mount and tow point fasteners, and rear towbar fasteners, unless otherwise specified.

FRONT BAR MOUNTS AND TOW POINTS + REAR TOWBAR	
Size	Torque Nm
M10	57 Nm
M12	100 Nm
M14	164 Nm
M16	248 Nm

Always use a torque wrench to set correct torque settings. Ensure torque wrench is set to Nm unit of measurement. Otherwise perform conversion to lb-ft.

PARTS LISTING

IMPORTANT: Check all parts are present before beginning work! Contact OFFROAD ANIMAL if something is missing.

TOOLS REQUIRED

The following tools will be required to install the product.

Hand Tools	Power Tools	Workshop Equipment
Metric Socket Set 8-19mm Socket Extension Bar Metric Spanner Set 10-19mm Hex (Allen) Key Set 4-8mm Trim Puller Tool Flat Blade Screwdriver set Phillips Head Screwdriver set Utility Knife	Electric/Air Impact Driver (Optional) Air Hacksaw or Angle grinder	Panel Stand or Soft Blanket Automotive Adhesive Sealant. Glue Removal Solvents

WORKSHOP SAFETY

It is the responsibility of the installer to always complete works in a safe manner. Make sure the following safety equipment is available and precautions are observed whilst fitting this product.

Hearing Protection 	Always wear ear protection when using power tools.
Eye Protection 	Ensure eye protection is always worn when cutting or drilling.
Manual Handling 	Do not attempt to lift bar assemblies or rock sliders on your own. Always use two people to lift or use mechanical Lifting aid such as hydraulic lifting trolley.
Vehicle Support 	Always ensure vehicle is properly supported when working on it. Do not attempt to fit products whilst suspension work is being carried out. Do not work under a vehicle supported only by a jack.

1. **Note** Most of these images show 2021-2023 model. 2015-2020 & 2024+ Models are similar. Where specific differences / extra steps exist, they will be pointed out.
2. Remove the Radiator shroud by removing the 6x clips securing it to the grille and cross member.
3. Push down on the center of the clips to release then remove with trim tool.

TOOLS REQUIRED

Trim Tool

FASTENERS

Push Center Clips

4. Remove the 4x 10mm Head screws securing the top of the grille
5. Retain fasteners for re fitment.

TOOLS REQUIRED

10mm Socket / Spanner

FASTENERS

10mm Head Screws

2021+ MODELS ONLY		
		
6. Unplug the radar sensor module wiring connector, located on the back of the Toyota Badge / sensor. 7. If Equipped unplug the front camera wiring connector.	TOOLS REQUIRED	
	FASTENERS	

8. Remove the small screw and clip securing the bumper to the inner wheel arch liner.
9. Clip is a center release type. Pry up the center section to unlock then remove.

TOOLS REQUIRED

8mm Socket
Trim Tool

FASTENERS

Factory Clip and Screw

- 10. Remove the 3x 10mm head Screws securing bottom corner of bumper to inner wheel arch liner.
- 11. Complete on both sides of Vehicle.

TOOLS REQUIRED 10mm Socket / Spanner
FASTENERS Factory Screws

12. Remove the 3x 10mm head Screws securing bottom center section of bumper to inner wheel arch liner.	TOOLS REQUIRED 10mm Socket / Spanner
	FASTENERS Factory Screws

13. Remove the 2x 10mm Head/Phillips screws securing the bumper to crossmember. These screws are located on the edge near the headlights behind the grille.	TOOLS REQUIRED 10mm socket/spanner
	FASTENERS Factory screws

14. Remove the bumper. Start by pulling from the outside where the bumper meets the wheel arch and work towards the center from both sides.

TOOLS REQUIRED

FASTENERS

2021+ MODELS ONLY	
	
15. With assistance once the bumper is loose, unplug and release the parking sensor and fog light harnesses. 16. It is easiest to remove the sensor from the bumper by releasing the clips on back side then pushing sensor through the bumper, leaving it hanging on the cable. 17. This needs to be done on both sides of the vehicle.	TOOLS REQUIRED
	FASTENERS

18. Once bumper is removed set aside on soft non marking surface or panel stand.
19. Release the bumper from the grille by releasing all the clips along the bottom of grille with a trim tool

TOOLS REQUIRED

Trim Tool

FASTENERS

20. Remove the front bumper support plastic fasteners using trim tool and Phillips screwdriver to pry whilst loosening as shown. 21. Remove the forward bolt using 10mm socket. 22. Remove the bumper support using a trim tool. 23. Complete on both sides of the vehicle.	TOOLS REQUIRED Trim Tool Phillips Screwdriver 10mm socket
	FASTENERS

24. Replace the forward bolt to re-secure the headlight to the wing. 25. Complete on both sides of the vehicle	TOOLS REQUIRED 10mm Socket
	FASTENERS

26. Remove the plastic cover from the impact beam by strongly pulling in the direction shown to release it from the clips

TOOLS REQUIRED

FASTENERS

27. Remove the impact beam by removing the 4x Factory flange bolts securing it to the chassis rail
28. Release plastic clips on behind the impact beam in the air guides.

TOOLS REQUIRED

15mm Socket
Trim Tool

FASTENERS

Factory flange bolts

Retain

29. Take impact beam off car and discard.	TOOLS REQUIRED
	FASTENERS

30. Vehicle chassis rails should now be totally exposed as shown.
31. For light colored vehicles it is a good idea to paint the exposed panels beneath the headlight black, to ensure neat appearance once bar is fitted.

TOOLS REQUIRED

FASTENERS

32. Mark air guide on Right hand side of vehicle as shown in the above image. 33. Remove air guide from vehicle by releasing the 3x clips holding it to the chassis.	TOOLS REQUIRED Paint Marker Trim tool
	FASTENERS

34. Mark air guide on Left hand side of vehicle as shown in the above image. 35. Remove air guide from vehicle by releasing the 3x clips holding it to the chassis.	TOOLS REQUIRED Paint Marker Trim tool
	FASTENERS

36. Trim the air guides along the lines marked, using a sharp utility knife or air hacksaw. 37. Re-Fit the top half of the air guides trimmed to the vehicle.	TOOLS REQUIRED Utility Knife
	FASTENERS

38. Take the chassis brace and fit loosely to the threaded M12 fine pitch insert in chassis, using M12x30x1.25 Bolt and flat washer.
39. Insert the Nut Plate into the chassis rail through the opening on the front of the chassis.
40. Secure the nut plate with M12x30 standard pitch bolts and flat washers through the holes shown. Leave finger tight at this stage.
41. Repeat for other side of vehicle.

TOOLS REQUIRED

FASTENERS

1x M12x30x1.25p Bolt
2x M12x30x1.75p Bolt
3x M12 Flat washer

Per side

42. Fit the impact assembly to the end of the chassis rail.
43. Secure finger tight with the original M10 bolts in the threaded inserts in chassis.
44. Repeat for other side of vehicle

TOOLS REQUIRED

FASTENERS

2x Factory M10 flange
bolt

Per side

45. Fit remaining bolts to the impact assembly. 2x M10x30 Bolts, 2x Flat washers and 2x flange nuts to front face.
46. Fit 2x M10x30 Bolts, 2x Flat washers and 2x flange nuts to Bottom face.
47. Fit 1x M10x30 Bolt, 1x Flat washer and 1x flange nut to Top face.

TOOLS REQUIRED

FASTENERS

5x M10x30 Bolt
5x M10 Flat washer
5x M10 Flange nut

Per side

48. Measure the distance between the outside faces of the uprights on the bar. Note this distance

Bar uprights _____mm

49. Adjust the distance between the impact assemblies to be approx. 1-2mm greater than the upright distance on the bar.

50. Tighten bolts on the impact assemblies and re-check distance. Loosen and adjust as required until the distance between mounts when mounts are tight is correct.

TOOLS REQUIRED

Tape measure
16mm Spanner
16mm Socket

FASTENERS

51. Remove the 3x Screws securing the fog lights to the bumper, then remove the fog light from the bumper.

TOOLS REQUIRED

Screwdriver

FASTENERS

Factory Screws

2021+ MODELS ONLY

52. Remove parking sensors from housings, by prying apart the locking tabs, whilst pushing sensor from front side of bumper.

TOOLS REQUIRED

FASTENERS

2021+ MODELS ONLY

53. Fit the parking sensors to the supplied F-0032 Parking sensor housings. Ensure the sensor fully clips into the housing and is straight.

54. Ensure the locating rib in the sensor is aligned with the slot on the sensor housing

TOOLS REQUIRED

FASTENERS

2021+ MODELS ONLY

55. Clean the areas on the inside of the bullbar adjacent to the round parking sensor holes with isopropyl alcohol.
56. Break the bulb of the supplied Primer 94 ampule to activate the primer dispensing.
57. Apply Primer 94 to all areas adjacent to the parking sensor locations, on both the bar and the sensor housings.

Important: allow at least 5 minutes for the primer to chemically bond to the surfaces.
58. Apply supplied VHB tape pads to all sensor housings as shown in the inset photo.
59. Dry fit sensors to bar to check if enough room to connect loom.
60. Remove backing and adhere sensors in position in bar. Apply pressure for 10-30sec after positioning for best adhesion.

TOOLS REQUIRED

Isopropyl alcohol
Rag

FASTENERS

VHB Tape pads
Primer 94 Ampule

2021+ MODELS ONLY

61. If fitted to MY21-23 you can choose to relocate the front camera to the fairlead mesh panel. This will improve the camera field of view.
62. If fitted to MY24+ you NEED to relocate the front camera to the fairlead mesh panel. The factory camera position is lower on these models and bar will almost completely obstruct camera view if left in OE location.
63. If relocating the camera remove module from the grille with 2x Phillips head screws.
64. Unclip wiring harness from bracket but leave the camera attached to the bracket.

TOOLS REQUIRED

Phillips head screwdriver
Trim tool

FASTENERS

Factory Screws

Retain

2024+ MODELS ONLY		
		
65. Separate grille from bumper by releasing the 4x Red clips. It can be helpful to push the clips from behind using a small socket to avoid marking the grille.	TOOLS REQUIRED Trim Tool Small Socket	
	FASTENERS	

2024+ MODELS ONLY					
 The diagram shows a front view of a Toyota Hilux grille. A horizontal line is drawn across the grille, with a vertical line extending upwards from the left side of this horizontal line. A yellow box labeled '95mm' is positioned next to the vertical line. Another yellow box labeled '145mm' is positioned below the horizontal line, with a horizontal line extending from the left side of the box to the vertical line. The area above the horizontal line is shaded green, and the area below is shaded red. The word 'HILUX' is visible on the grille.					
66. Apply masking tape over cut areas. 67. Mark out the grille cut as denoted by lines in image. Ensure it is symmetrical, reposition the tape if required. Green area is to be retained, red to be removed. 68. Using angle grinder or air hacksaw, cut along edge of the tape. Ensure cut is neat and free of jagged edges. 69. Cut all vertical slats just below horizontal bar to allow the grille to separate into two pieces.	<table><tr><th>TOOLS REQUIRED</th></tr><tr><td>Angle Grinder or Air Hacksaw</td></tr><tr><td>Masking Tape Marker</td></tr><tr><th>FASTENERS</th></tr></table>	TOOLS REQUIRED	Angle Grinder or Air Hacksaw	Masking Tape Marker	FASTENERS

FASTENERS					

2024+ MODELS ONLY	
 The diagram shows a 3D model of a bumper with several yellow lines indicating where to cut. A callout box labeled 'Vertical, Following Molding Lines' points to a vertical line on the left side. Another callout box labeled 'Normal to Curvature of bumper' points to a line that follows the curve of the bumper's top surface. A third callout box labeled 'Horizontal Below Clip Hole – Parallel to Top' points to a horizontal line below a clip hole. An inset image shows a close-up of the bumper's top edge with a red line indicating the cut path and a yellow arrow pointing to it.	
70. On the bumper, apply masking tape over cut areas. 71. Mark out the Bumper cut as denoted by lines in image. Ensure it is symmetric, only 1 side is shown in image, reposition the tape if required. Green area is to be retained, red to be removed. 72. Using angle grinder or air hacksaw, cut along edge the marked lines. Ensure cut is neat and free of jagged edges.	TOOLS REQUIRED Angle Grinder or Air Hacksaw Masking Tape Marker FASTENERS

2024+ MODELS ONLY

73. Refit the cut bumper segments to the trimmed portion of the grille, re using the factory molded clip at the top and red clip below.

74. The grille is now ready for refitment to the vehicle.

TOOLS REQUIRED

FASTENERS

75. Place masking tape on the grille, in the location shown just below the center horizontal bar.
76. Then mark out the grille cut as denoted by lines in image. Ensure it is symmetric, reposition the tape if required.

TOOLS REQUIRED

Masking Tape

FASTENERS

2021-2023 MODELS ONLY		
		
77. Using angle grinder or air hacksaw, cut along edge of the tape. Ensure cut is neat and free of jagged edges. 78. Cut all vertical slats just below horizontal bar to allow the grille to separate into two pieces.	TOOLS REQUIRED	
	Angle Grinder or Air Hacksaw	
	FASTENERS	

2018-2020 MODELS ONLY

79. Using Similar technique as explained for 2021+ models cut the grille along the top edge of the horizontal bar below the badge, as shown in the above image.

Ensure cut is neat and free of jagged edges.

TOOLS REQUIRED

Angle Grinder
or
Air Hacksaw

FASTENERS

2021-2023 MODELS ONLY

Production Bracket

Note: Prototype
part shown in
photo

80. Fit the bottom grille support bracket to the middle of the top section of the grille, under the adaptive cruise radar sensor.

81. Remove the existing Philips head screw, then re fit with bracket in place.

TOOLS REQUIRED

Phillips head screwdriver

FASTENERS

Factory screw

2015-2018 MODELS ONLY

82. Clip the grille support bracket into the tabs on the back side of the grille.

TOOLS REQUIRED

FASTENERS

2021+ SR5 MODELS ONLY

83. Fit the plastic infill panels to the bar, using supplied M6x16 Black Button head bolts, Black washers, and flange nuts.

TOOLS REQUIRED

4mm hex key

FASTENERS

3x M6x16 Black button head
3x M6 Black washer
3x Flange Nut

Per side

84. Using 3M primer stick from parking sensors, apply primer to end of fender panel and small headlight infill in the bonding area as shown. Important: allow at least 5 minutes for the primer to chemically bond to the surfaces. 85. Cut and apply length of 3M tape to the small headlight infill panel as shown in the top inset image. 86. Fit the headlight infill using the 3M tape. Apply pressure for 10-30 seconds to ensure strong bond. 87. Use final tape pad to secure the backside edge of the infill to the underside of the headlamp.	TOOLS REQUIRED
	FASTENERS 3M Primer 94 3M Tape

88. Re fit the trimmed section (2018+) of the grille to the vehicle. For 2015-2018 Models just refit grille as removed from bumper.
89. Secure top of grille using original 10mm Fasteners.
90. Secure the grille support bracket to the plastic insert in the using a self tapping Philips screw (2015-2023 Models)
91. 2024+ Models only, secure the trimmed section of the bumper (clipped to the grille) to the original support locations in the corners using original Fasteners.

TOOLS REQUIRED

10mm Socket
Phillips screwdriver

FASTENERS

Re-use OE Fasteners

92. If fitting a light bar to the center section of the bar, do so at this stage, before fitting the bar to the car.
93. Use hardware provided with the Lights to fit to the bar.
94. This is also the best time to fit driving lights or top hoop to the bar.
95. After fitment of driving lights fit the pan brace between the gusset and Top pan using supplied M6 hardware as shown.
96. (Optional) Fit the pinch weld rubber to the top edge of the bar/wings.

TOOLS REQUIRED

4mm Hex
10mm Socket / Spanner

FASTENERS

2x M6x16 Button Head
2x M6 Flat Washer
2x M6 Flange nut

97. Insert cage nuts to square slots in bottom of wings. Seat cage nut against one edge of slot then push other edge in with flat bladed screwdriver.

TOOLS REQUIRED

Flat bladed screwdriver

FASTENERS

5x M6 Cage Nuts

Per side

98. With assistance, from either another person or mechanical lifting aid such as a lift trolley, offer the bar up to the mounts.
99. Secure the bar to the mounts using single M12x30 Bolt, 2x M12 Heavy Duty flat washers and M12 Nyloc Nut per side.
100. Loosely fit the other 3x M12x30s Bolt 6x M12 Heavy Duty flat washers and 3xM12 Nyloc Nuts per side.

TOOLS REQUIRED

Lifting trolley

FASTENERS

8x M12x30 Bolt
16x M12 HD Washer
8x M12 Nyloc Nuts

101. Align the bar with the body. Aim for 15-20mm clearance between the wing and body.

IMPORTANT: It is the installers' responsibility to ensure clearances are set so that no part of the bar touches the vehicle. Remember that body is rubber mounted and will move relative to bar in use.

NOTE: The appearance will differ slightly from the above image due to the new body mounted infill

102. With assistance, Hold the bar in position and tighten all the Bar to mount bolts, using 19mm socket and spanner.

An Electric Impact wrench makes this process much easier.

TOOLS REQUIRED

19mm socket
19mm spanner

FASTENERS

103. If fitting a winch to the bar, do so at this stage. Follow the winch manufacturer's instructions.
104. The winch mounts feet down and is inserted through the front opening of the bar.
105. Most winches will fit underneath the triangular cross brace. If required for clearance of top mounted control box, trim this cross brace as shown in the inset image to gain sufficient clearance, using an angle grinder or air hacksaw.

TOOLS REQUIRED

Refer to winch Instructions

Grinder or Air Saw

FASTENERS

Refer to winch Instructions

106. If relocating the camera module, fit to the center mesh panel, using the original bracket, and supplied M6x16 button head screws, flat washers, and flange nuts.
107. If fitting winch, attach fairlead to center mesh panel using bolts supplied in winch fitting kit.
108. Fit number plate flip to mesh panel using M6x20 Hex bolt, Flat washer, and flange nut, supplied in number plate flip kit.

TOOLS REQUIRED

10mm Socket
4mm hex key

FASTENERS

2x M6x20 Hex Bolt
4x M6 Flat washer
4x M6 Flange Nut
2x M6x16 Black Button Head

121. Re-connect all wiring harnesses to the adaptive cruise sensor, parking sensors and fog lights. 122. Replace the radiator shroud to top of grille, Secure with factory push center clips.	TOOLS REQUIRED
	FASTENERS

123. Fit bash plate to vehicle. 124. First secure the top of the bash plate to the bottom of bar, with the mesh panels sandwiched in between. Secure with M8x20 black button head bolts and black washers into the threaded inserts in the bar. 125. Secure bottom of bash plate to mounts using M10x30mm Button head Bolt, Flat washer and M10 Flange Nut. Insert nut through access hole in bash plate as shown.	TOOLS REQUIRED 5mm Hex key 6mm Hex key 15mm Spanner
	FASTENERS 4x M8x20 Button head Bolt 4xM8 Flat washer 2x M10x30 Button head Bolt 2x M10 Flat washer 2x M10 Flange nut

126. Fit side under panels to bar and secure with 5x M6x16 Button head bolts and M6 Flat washers, into M6 cage nuts fitted earlier.

Fitting center bolt first will make it easier to align panel to bar.

127. Secure the back corner of under panel to mount using M8x20 Hex bolt, Flat washer and M8 Flange Nut,

OR

B1768 L Bracket and 2xM8x20 Hex bolt, 2x M8 Flat washer and 2x M8 Flange Nut depending on version of under panel in the kit.

128. Repeat for other side of vehicle.

TOOLS REQUIRED

4mm Hex Key
13mm Spanner / Socket

FASTENERS

10x M6x16 Button head bolt
10x M6 Flat Washer

2/4x M8x20 Hex head
2/4x M8 Flat Washer
2/4x M8 Flange nut

129. Mark where wheel arch liner intersects with side under panel with paint pen or other marker.
130. Create line offset approximately 20mm below intersection point.
131. Trim wheel arch liner to this line using utility Knife.
132. Insert wheel arch liner behind flange on side under panel.

TOOLS REQUIRED

Marker
Utility Knife

FASTENERS

133. **Toro only.** Fit antenna brackets to Toro uprights using M8x20 black button head bolts and black washers.

Note: Due to close fitting nature of bar oversized UHF antenna bases are not suitable for fitment.

134. **Toro only.** Else fit the 2x M8x20 black button head bolts and black washers to the back of each bullbar upright, to protect nut threads in bar for future use.

TOOLS REQUIRED

5mm Hex Key

FASTENERS

2x M8x20 Black Button head
2xM8 Black Flat Washer

Per side

135. Fit the logo plate to the front of the bar as shown. 136. Fit the Compliance plate in a visible location on the underside of the bar. We recommend placing it on the bottom of the center bash plate. 137. Review fitment and double check all bolts are tight.	TOOLS REQUIRED
